

## SPP-N118

The SPP-N118 flow counters are encased in a tight, wall-mounted housing (IP 67) and designed to work together with flow transducers equipped with analogue input. The purpose of flow counters is to measure the instantaneous flow value and to record the total flow of media like liquids, gases or loose materials. A wide range of total flow indication (up to 16 digits) allows controlling the flow value for a long operation time. Thanks to the built-in batcher function the SPP-N118 counters can be used in many industries like: food, pharmaceutical or paint and varnish industry. The REL / OC control outputs can be programmed depending on the instantaneous flow value, batcher or total flow value. Additionally the counter may be equipped with analogue outputs, according to the customer selection: active current output, passive isolated current output or active voltage output. The counter may be configured with no need to open the case, by using the remote controller or with free S-Config software via the RS-485 communication port.

TECHNICAL DATA

| Power supply <br> Power consumption | $19 \mathrm{~V} \div 50 \mathrm{VDC} ; 16 \mathrm{~V} \div 35 \mathrm{~V} \mathrm{AC}$ or $85 \div 260 \mathrm{~V} \mathrm{AC} / \mathrm{DC}$ or $12 \mathrm{~V} \mathrm{AC} / \mathrm{DC}$, all separated <br> for $12 \mathrm{~V} \mathrm{AC} / \mathrm{DC}, 85 \div 260 \mathrm{~V} \mathrm{AC} / \mathrm{DC}$ and $16 \mathrm{~V} \div 35 \mathrm{~V}$ AC power supply: max. 5 VA ; for $19 \mathrm{~V} \div 50 \mathrm{~V}$ DC power supply: max. 5 W |
| :---: | :---: |
| Display | LED, $6 \times 13 \mathrm{~mm}$ high, red, brightness adjustable in 8 steps |
| Displayed values range | $0 \div 999999$ + decimal point |
| Inputs | current: $0 \div 20 \mathrm{~mA}$ or $4 \div 20 \mathrm{~mA}$, overload-protected, sinking current limited to ca. 40 mA , input resist.: < $65 \Omega$ (typ. $50 \Omega$ ) programmable: binary 24V DC, not separated |
| Input levels | low level: $0 \mathrm{~V} \div 1 \mathrm{~V}$, high level: $10 \mathrm{~V} \div 30 \mathrm{~V}$ (about $12 \mathrm{~mA} @ 24 \mathrm{~V}$ ) |
| Accuracy | $0.1 \% @ 25^{\circ} \mathrm{C} \pm$ one digit (for $0 \div 20 \mathrm{~mA}$ range) |
| Stability | $50 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ |
| Counter capacity | total flow: over $4 \times 10^{9} \mathrm{~m}^{3}$ with max. resistance $0,001 \mathrm{I}$ (max. 16 significant digits); $\underline{\text { batcher: }}$ up to $65536 \mathrm{~m}^{3}$ |
| Readout precision | instantaneous flow values: selected in the $0 \div 0.000$ of unit; total flow and batcher: selected in the $0 \div 0.000$ of unit |
| Units | instantaneous flow values: I or $\mathrm{m}^{3}$ per second, minute or hour; total flow and batcher: 1 or $\mathrm{m}^{3}$ |
| Outputs (option) | 0 or $2 \times$ REL $I_{\max }=5 \mathrm{~A}, \mathrm{U}_{\max }=30 \mathrm{VDC} / 250 \mathrm{VAC}(\cos \varnothing=1)$ or $O C \mathrm{I}_{\max }=30 \mathrm{~mA}, \mathrm{U}_{\max }=30 \mathrm{VDC}, \mathrm{P}_{\max }=100 \mathrm{~mW}$ |
| Analogue output <br> (available with $1 \times$ REL or OC, see ordering) | active current: operating range $0 / 4-20 \mathrm{~mA}$ (max. 0-24 mA), load resistance $700 \Omega$ max., resolution 13 bit passive current: isolated, operating range 4-20 mA (max. 2,8-24 mA), load resistance $600 \Omega$ @24VDC, resolution 13 bit active voltage: operating range $0 / 1-5 \mathrm{~V}, 0 / 2-10 \mathrm{~V}(\max .0-11 \mathrm{~V})$, load resistance min. $2000 \Omega$, resolution 13 bit |
| Power supply output | 24V DC +5\%, -10\% / max. 100 mA , stabilized |
| Communication interface | RS-485, 8 N 1 and $8 \mathrm{~N} 2,1200 \mathrm{bit} / \mathrm{s} \div 115200 \mathrm{bit} / \mathrm{s}$, Modbus RTU (not galvanically isolated) |
| Data memory | non-volatile memory, EEPROM type |
| Operating temperature | $0^{\circ} \mathrm{C} \div+50^{\circ} \mathrm{C}$ (standard), $-20^{\circ} \mathrm{C} \div+50^{\circ} \mathrm{C}$ (option) |
| Storage temperature | $-10^{\circ} \mathrm{C} \div+70^{\circ} \mathrm{C}$ (standard), $-20^{\circ} \mathrm{C} \div+70^{\circ} \mathrm{C}$ (depending on option) |
| Protection class | IP 67 |
| Case | wall mounting; material: ABS + polycarbonate (standard); $100 \%$ polycarbonate (on request) |
| Glands | M12, cable diameter $3 \div 6,5 \mathrm{~mm}$ |
| Dimensions (WxHxD) | without glands: $110 \times 80 \times 67 \mathrm{~mm}$; with glands: $110 \times 105 \times 67 \mathrm{~mm}$ |
| Weight | max. 350 g |

| C : $1 \times \mathrm{OC}+1 \times \mathrm{AO}$ (0/1-5V, 0 | ive, non-isolated) |

The SIR-25 infraRed remote control may be used as external programming keyboard for all SIMEX devices equipped with IR receivers and remote programming functions. Pressing of any local IR controller key, causes transmission of it's code to the device. The remote control features a five-button keyboard, including the F/乏/RESET function button dedicated to the operation of the devices in the following group: counters, flow meters, and tachometers. Functions of particular keys depend on devices features.

Power supply voltage: 3V DC - 1 lithium battery CR2032 type
Operation range:

S-Config 2 is used for the simultaneous detection of devices in multiple Modbus RTU networks and allows user to change the configuration of most of them. For each detected device a list of its registers, which the user can modify, is displayed and also additional informations about device parameters (type, address in the network, etc.).
S-Config software can be downloaded from SIMEX website at www.simex.pl

SimCorder Soft is a visualisation application created to facilitate work with advanced networks of the SIMEX devices, for acquisition, visualisation, reporting, archiving, exporting and printing of measurement data from all network devices. You can download measurements from the devices automatically or on demand. There is a possibility of immediate notification about emergency states via SMS or e-mail, which will often allow to quickly resolve an arising problem while avoiding long and expensive stoppages. You can view the measurement data, emergency states and configuration via the internet at every time.

The SRS-U4 converter is designed to connect a USB host to slave devices equipped with RS485 interface. The PC with special software can be used as a host. The SRS-U4 unit guarantees full galvanic isolation between USB and RS-485 circuits. The converter can work with any devices equipped with RS-485 interface and contains integrated circuit which supports USB 1.1 and USB 2.0 standards. The main purpose is connection of PC host computer with industrial data acquisition and visualisation systems based on RS-485 interface.
The SRS-U4 can be also manufactured with DIN mounting adaptor.
