

TUFF N NUFF

R.I.P. SHIELD

R.I.P. Shield is a protective PVC rockshield that is utilized in place of select back fill.

- Eliminates the need for select back fill.
- Insures a full protective encirclement for PE gas mains and services, water and sewer piping, triplex electrical cable, coaxial cable, and fiber optic conduit.
- Protects the carrier pipe from rock migration and soil erosion sometimes associated with select back fill.
- Maintains consistent and uniform installations.
- Reduces the cost of installation.
- Increases productivity.
- Reduces waste (excess select fill material).
- Provides a protective color-coded warning barrier
- Provides an insulator between carrier pipe and tracer wire.
- Prevents damage to pipe/cable surface resulting from hand excavation.
